RESPONSE TO PROPOSER QUESTIONS REGARDING THE RFB ADDENDUM #2

DATE: February 11, 2020
PROJECT: Purrysburg Alum Pond Annual Excavation

Questions will be listed first, followed by BJWSA’s answers in bold.

1. Do you have an estimated budget for this project?  
The budget is $225,000.

2. What are the allowable working hours/days? If it’s not 24/7 is the area fenced for security purposes?  
Work may be conducted 24/7. The dewatering pad is fenced, and there is a gate at the road.

3. Do you have lab results from the previous job for specs?  No.

4. What kind of liner is the pond? Clay/plastic?  Clay

5. Do you have a boat we could use to grab samples for lab analysis?  
Alum sludge can be reached from the bank – a boat is not necessary for sampling.

6. Is the project bonded?  Yes.

7. Do you have dimensions of the dewatering concrete pad?  See the drawings in the RFB or the photos in Addendum #1.

8. Is there any way to get 3 phase 480V power provided?  
As stated in the drawings, 3 phase 480V power is provided.

9. Do you have more information/specs on the dredge header pipe? Is this for the dredge discharge pipe or the return water?
The dredge header pipe is the for the dredge discharge and is stubbed out in three locations on the long side of the pond and at the concrete pad. A dredge can be connected to the header pipe, and the dewatering equipment to the other end so that running dredge pipe is not required.
